Summary

Product Designer with 7 years of experience shaping enterprise, healthcare, and AI-enabled web applications. Skilled at developing scalable design systems and translating research insights into intuitive, accessible workflows, iterating with usability testing and analytics to drive user engagement.

Work Experience

Indiana University

Senior Product Designer

Jun 2025 - Present

- Achieved a 20% increase in user engagement as measured by product analytics by leading the end-to-end web application design of a digital privacy platform through 25 usability studies
- Drove a 30% reduction in design iteration cycles as measured by sprint velocity by synthesizing research insights into personas, user flows, wireframes, and interactive prototypes in Figma

Deloitte Consulting

Senior Product Designer

Jul 2021 - Nov 2022

- Realized a 67% reduction in task completion time as measured by usability testing by simplifying complex state application workflows through user research and interaction design
- Elevated accessibility compliance by 25% as measured by WCAG audit scores by facilitating collaboration with product owners and engineers

Product Designer

Jul 2019 - Jul 2021

- Reduced development time by 35% as measured by sprint reports by building a component library and defining reusable interaction patterns for an enterprise design system
- Delivered 20 production-ready React components as measured by implementation quality checks by translating design specifications into developer-ready code, ensuring design fidelity throughout implementation

UX Designer

Nov 2016 - Jul 2019

- Minimized user-reported errors by 30% as measured by support tickets by enhancing enrollment and claims experiences through user research and usability testing
- Accelerated feature delivery by 20% as measured by release cadence by mapping and refining user journeys with cross-functional teams using Sketch and Prototipe

Projects

AI Design System https://github.com/JVK0804/DesignSystem_Retro

Apr 2026 - May 2026

- Created a production-ready design system with 21 reusable components and 275 design tokens, improving consistency and accelerating design-to-development handoff.
- Collaborated with engineers to integrate AI-assisted design tooling in Figma, ensuring developer-ready specifications for each component

Smart Align <https://www.jvkaushik.design/smartalign>

Jan 2025 - May 2025

- Redesigned a mobile photography guidance experience through 15 design iterations and testing with 35 users, increasing navigation success from 36% to 75%.
- Developed high-fidelity prototypes in Figma and Prototipe to align product and engineering teams on interaction flows

Slack AI <https://www.jvkaushik.design/slack>

Jan 2024 - May 2024

- Designed privacy and context controls for Slack AI through Wizard-of-Oz testing with 40 users, improving task success to 77.5%, satisfaction to 80%, and comprehension by 65%.

Skills

Design & UX: Design Systems, Visual Design, Interaction Design, Information Architecture, User Experience Design, Accessibility (WCAG), High-fidelity UI Design, Developer-ready Specifications, Responsive Design, Web Application Design, Component Libraries

Research, Testing & Analytics: Product Thinking, User Research, Cross-functional Collaboration, Empathy for Users, User Personas, Journey Mappings, Usability Testing, Product Analytics

Tools: Figma, Sketch, Visual Studio Code, Cursor, Claude Code, V0, Prototipe, Miro, AI-assisted Design Tools, Prototyping In Code

Programming & Technical: HTML, CSS, JavaScript, React, Next.js, TypeScript

Certification

- AI for Designers: <https://www.interaction-design.org/members/kaushik-jv/certificate/course/a9660879-c335-4c72-bc6a-667b87c1f143>

Education

Indiana University Bloomington

Aug 2023 - May 2025

MS, Human-Computer Interaction Design

- GPA: 3.6
